

BUT with a big **B**, Blackwell's genuine Bull Durham is in a class by itself. You will find one company besides ours two more bag and two more points better than four times bag of.

## Blackwell's Genuine Durham Smoking Tobacco

Buy a bag of this celebrated tobacco and read it over—where has ever been so valuable present and tobacco offered?

### A HANDSOME BUILDING.

A complete description of the New Joe Barnett Building.

As THE CITIZEN goes to press, the finishing touches are being placed on the Barnett building, located on Second Street between Gold and Silver avenues.

It is large, substantial and charming, from the solid granite walls to

the elaborate carvings of the pediment cornice which will bear the load of study.

It is plain to be seen that the architect of this building has been a student of insurance architecture, although he departed in many details from the

classic type in order to accommodate him to the requirement of the problem given him to work out.

The design for a large show window has been admirably responded to, and the glass of plate glass in relation to total width of the front is greater than in any other city.

It is the first consideration, the remainder of the design became dependent upon this feature and has been elegantly accommodated.

Two pairs of bold, black-lead inlaid star support a stone cornice with rich curved tympanums; the intervening space between this central bay and theそれ each end of the front is divided almost pleasing proportions by four columns, each supporting a great sky-line fluted with brick and interpersed effectively arranged festooning, thus giving up the general appearance of said mass resting on the first-story aluminum columns, inlaid plated hardware glass.

The general coloring of the entire front was successfully carried to completion and is both attractive and inviting, especially the entrances where the tilting iron designed for the exact space and size of the letters of the new firm which occupy the store, while the highly polished bronze hardware finds a splendid accompaniment in the pure white door.

In the rear a plank drive way has been constructed from Silver avenue, which seems from disuse the lot where the shadows, thus covering it from view improving the outlook.

Setting the building, one finds everything bright and cheerful, with all the conveniences for the use of tenant, stonemaster, and a generous supply of space in which to display the goods.

Two elevators, now on the way from stage, are to give the only needed advantage in order to complete these accommodations; one will be used in lifting packages, coals and odds and ends by W. Y. Walton.

### SAFETY OF INSPECTORS. They are returning to Chicago.

C. F. Higgins, in assistance to the press of the Atchison Topeka & Santa Fe, James Dunn, chief engineer, W. G. Nevin, general purchasing agent, John Player, superintendent of machinery, with K. H. Wade, general manager for the Southern California railway, reached the city from the west last Saturday evening at noon on a special train.

This is precisely what Hamilton did, and in hisatty celebrated report to congress says:

"The proportion of 15 to 1 is recommended by the particular situation of our trade as being very nearly that which obtains in the market of Great Britain to which market our species is principally exported."

This recommendation of Hamilton, absolutely endorsed by Jefferson, was accepted by the congress of 1792, and thus the first legal ratio between our gold and silver coins was established upon the commercial value of the metals as then existed in the markets of the world.

These facts Capt. Sterry made the basis of his address, and they have never since, let alone "many times been refuted."

In practice it was discovered that the two metals on the established ratio did not circulate concurrently, gold went out of circulation.

It was also found, according to the best information obtainable, that our brand new, bright and clean silver dollars as they came from the mint were worth a trifle more than the Mexican and the Spanish dollars which were legal tender like our own, and for this reason they would not stay in circulation.

The result was that President Jefferson, the same who wrote the Declaration of Independence and founded the democratic party, stopped the coinage in 1800, 1802 and 1804.

He is a man of strong convictions and sound judgment, and in the deliberations of the council he was always well aware to the importunity of any unwise measure, whether it emanated from political friend or foe, and was equally anxious to see that such unwise men of extreme opinion as he was open to argument and was not to respond to a call of duty even though it required a radical change in his views.

His final position on the Hinkle bill was an illustration of this. Mr. Petre is a man of great popularity among the people of his home country, where he is best known, and it seems certain that any honor within their gift can be obtained by him simply for the asking.

**C. F. FRITH ROCKFORD, JR.** writes:

"From personal experience I can recommend Dr. W. T. Sarsaparilla, a cure for grippe, rheumatism, and general debility." W. Y. Walton.

### SCHAWER'S CLOTHING.

Freighton M. Foraker, a delegate to today's convention from Grant county, is a full brother of Senator-elect Joseph R. Foraker of Ohio. He is a carpet bagger, either having been engaged in the cattle business in Grant county for the past fourteen years. His parents reside at Hillsboro, Ohio, the abode of his father being 81 years, and that of his mother 55 years.

In the probable event of the election of McKinley, he may possibly be in some difficulty for a coveted and paying position.

Speed and safety are the watchwords of the age, one Minute Cough Cure acts speedily, safely and never fails. Asthma, bronchitis, coughs and colds are cured by W. Y. Walton.

### SAN SIGNED Delegates.

The following are the names of the delegates to the democratic territorial convention at Santa Fe from San Miguel county, J. D. W. Aeeler, F. A. Gonzalez, John W. Wallace, Dr. E. A. Gonzales, W. E. Baena, Felipe Bacay Garcia, Antonio Luera, Felix Martinez, L. R. Allen, Julian Sandova, Manuel Silvia, Clemente Angel, J. M. Hernandez, Francisco Romero, Sostenes Delgado, J. M. Tafolla, C. H. Norton and S. H. Wells.

### Real Estate Transfers.

M. W. Flournoy and Gus Mullholland, trustees, to Mrs. Maria Raillard, release, west 135 feet, lot 11 and 15, and east 17.6 feet, lot 16, block 39, Gallup town.

S. L. Blethen to Rose Leonard, uniting deed, 38.120 interest in the Almarie, Families, Huron, Ontario and Homestake mines, also 19.120 interest in the South Side Smuggler gift and No Name mines.

Jacob Becker, warranty, lots 4 and 5, block 10, Duran Alexander addition, consideration, \$200.

### JOHN STERREY'S GRAND SPEECH!

Such Was Judge Sterry's Address Saturday Night.

His Talk Listened to by an immense Crowd.

And He Gave Some Facts That Cannot be Refuted.

### OTHER LOCAL HAPPENINGS.

From Daily Sept. 28

Judge C. N. Sterry, who, upon invitation, addressed the citizens and especially the workingmen of Albuquerque at the opera house last Saturday night, was warmly received, and his able and forcible address attentively listened to by one of the largest crowds that ever assembled on such an occasion in this city.

The CITIZEN representative was present and followed the speaker from beginning to end, and the facts and arguments presented by the judge have never yet been successfully refuted, and moreover these facts are incontrovertible.

Alexander Hamilton, the first secretary of the treasury, the most uncompromising federalist and the ablest financier of his time in the United States, and Thomas Jefferson, the illustrious author of the Declaration of Independence and founder of the democratic party that existed from the meeting of the thirteenth convention to the meeting of the thirteenth convention in 1800, agreeing in scarcely anything else, agreed that the legal ratio to be established by law between the two metals, gold and silver, should be the commercial ratio. To find this ratio Jefferson said, "First principles will lead us to disregard legal proportions altogether, to inquire into the market price of gold in the several countries with which we shall principally be engaged in commerce, and to take an average from them."

This is precisely what Hamilton did, and in hisatty celebrated report to congress says:

"The proportion of 15 to 1 is recommended by the particular situation of our trade as being very nearly that which obtains in the market of Great Britain to which market our species is principally exported."

This recommendation of Hamilton, absolutely endorsed by Jefferson, was accepted by the congress of 1792, and thus the first legal ratio between our gold and silver coins was established upon the commercial value of the metals as then existed in the markets of the world.

These facts Capt. Sterry made the basis of his address, and they have never since, let alone "many times been refuted."

In practice it was discovered that the two metals on the established ratio did not circulate concurrently, gold went out of circulation.

It was also found, according to the best information obtainable, that our brand new, bright and clean silver dollars as they came from the mint were worth a trifle more than the Mexican and the Spanish dollars which were legal tender like our own, and for this reason they would not stay in circulation.

The result was that President Jefferson, the same who wrote the Declaration of Independence and founded the democratic party, stopped the coinage in 1800, 1802 and 1804.
